

PROFILE

Seeking backend or fullstack web development opportunities. Creative, strategic, and flexible working with both technical and functional teams.

EXPERIENCE

BeTech (2018 - Present)

Web

Developer

- Create new features and fix bugs using AngularJS and Firebase for a government contracting social networking site in the Washington DC area.
- Worked with existing PHP/JavaScript codebase to create complex Highchart data visualizations and integrated social media sharing features across client site.

The ANA Project (2017)

Tutor

- Provided non-profit tutoring and mentor services to underserved youths of Washington DC public schools for SAT/ACT test preparation.

Fruition Partners - A DXC Company (2014 - 2016)

Technical

Consultant

- Created custom solutions to fulfill business requirements using JavaScript in conjunction with the ServiceNow library and maintained functional / technical documentation to track all development.
- Lead client engagements in implementing ITIL best practices to create, manage, and enhance ServiceNow instances.

IT Engineer

- Managed service desk, hardware, network, and cloud environments serving over 350 employees.
- Lead platform migration from Google to Microsoft involving SharePoint architecture design, communication planning, contractor management, go-live support, and employee training.

Alion Science and Technology (2011 - 2014)

Knowledge Management

Analyst

- Served as SharePoint lead developer throughout entire project life cycles of Finance SOX auditing, HR ethics compliance, and IT cyber-security training.

Whitener and Jackson General Contractors (2010 - 2011)

Project Manager

Firstlight ERA (2009)

Associate Sales Manager
